

Holmes-Wayne Electric Cooperative, Inc.

Don't get lost in the EPA's regulatory shuffle

*Glenn W. Miller
President/CEO*

SIX HUNDRED FIFTY PAGES, plus another thousand pages of supporting documents — that's the length of the latest proposal from the Environmental Protection Agency (EPA). It would amend the Clean Air Act, which is only 465 pages, to limit carbon dioxide emissions from the power plants we rely on.

Besides the actual rule, a lot has been written about its legality, feasibility and complexity. **But lost in the shuffle of these thousands of pages is its impact on people.** How will reliability be impacted? How much will electric bills increase? Will manufacturers relocate? How many jobs will be lost? Which power plants will be forced to shut down?

These are difficult questions. But they're important questions. At Holmes-Wayne Electric Cooperative, Inc., we work hard to keep your electricity affordable and reliable. That's why we're asking the EPA for answers to these and many other questions.

We don't want you to get lost in the shuffle. We put you, our members, first. We advocate for you. We see you every month paying your bill at the office. We work with you. We know when times are tough. We often live next door.

After all, you govern us. Our board members and community leaders are one in the same. We're as local as any organization, and we like it that way.

That's why we keep reminding the administra-

tion in Washington, D.C., that the rules they write have an impact in the real world — where we live.

That's why we're encouraging everyone to take 30 seconds to sign up at www.Action.coop and tell the EPA we cannot afford these regulations.

Many members in our community cannot afford an increase in their electric bill and reliability will have a huge impact on all members. With the current proposal, rolling blackouts could occur on high usage days.

Please raise your voice. Don't get lost in the shuffle. Together, we can tell the EPA that support for the environment and a true all-of-the-above energy policy are not mutually exclusive. Together, we can talk about our energy efficiency programs. We can talk about our renewable energy options. We can talk about how we did this without any mandates. We can talk about how we did this because it's the right thing to do.

Together we'll remind regulators and lawmakers that the impact new rules and laws have on people should be their first thought, not their last.

With more than 900 electric cooperatives in the country backing us up, our voice can be heard. We have a great and positive story to tell. We can tell the story together. And it won't even take 1,600 pages. Please take a moment to visit www.Action.coop today. ☺

HWEC linemen survive lightning strike

A HEAVY DOWNPOUR wasn't new to HWEC line personnel this rainy summer, but we know better than to take lightning for granted. Class A Linemen Darin Stefano and Michael Maurer were thankful to be alive after their maintenance truck was struck by lightning in the early morning hours on Aug. 20.

Stefano and Maurer had been called out at 10:30 p.m. to help restore power. They worked through the night, with outages scattered throughout the Holmes County area. About 5 a.m., the crew was waiting for the third and final storm to calm before leaving the truck to work just north of Killbuck.

The linemen learned firsthand the importance of heeding safety rules concerning lightning — stay indoors, and if you're outside, seek shelter in a vehicle or away from tall objects — when their truck was struck in a valley along Township Road 54. The horn honked, the radio flickered and headlights flashed. Within seconds, they smelled smoke — the lightning strike had sparked a fire. At one point the truck tried to start without the keys in the ignition. Stefano and Maurer jumped out of the truck and tried to put out the fire with an extinguisher, but the flames spread too rapidly through the cab, where they'd sat only seconds before.

They called 911, and firefighters were able to safely put out the blaze, which was contained to the truck."

The mission of Holmes-Wayne Electric is to provide safe and reliable electric. This includes investing in safety training for field personnel not only on job-specific tasks but also for first responders and weather identification.

"Many people forget that we not only have a highly dangerous job working with electricity, but power restoration is usually under less-than-ideal conditions," Maurer said. "We try to restore power as quickly and efficiently as possible, but there are times where weather makes that very challenging and dangerous too."

Lightning strikes to vehicles are a rare incident, but these two linemen responded in a quick and appropriate way. Exiting the truck was essential, as most vehicles will catch fire and air bags will go off. Fortunately, the air bag on the passengers side deployed only after both men were outside of the truck.

Holmes-Wayne Electric members set a milestone in generosity

HWEC members are making a difference in our community. More than 7,200 members have made the choice to round up their electric bill every month. The spare change is placed in the Operation Round Up Foundation.

Funds are distributed to those in need within the Holmes-Wayne service territory. The money is never used to pay past-due bills, including an HWEC electric bill.

If you are interested in joining the Operation Round Up program, it's easy! Call us toll free at 866-674-1055 or e-mail us at newmember@hwecoop.com.

**Over
\$400,000
donated back
to the
community!**

I get CASH from my electric company?

What are capital credits?

Capital credits distributions from member-owned, not-for-profit utilities like Holmes-Wayne Electric Cooperative are somewhat similar to the dividends paid to shareholders of investor-owned utilities. The difference is that a co-op's "shareholders" are also the members that it serves and the "dividends" are capital credits distributed to the cooperative's member-owners.

What's the difference between allocated and retired capital credits?

Allocated capital credits appear as an entry on the permanent financial records and reflect your equity, or ownership, in HWEC. Every year, the cooperative notifies its member-owners of the amount added to their patronage capital account through a printed notice on their May electric bills. When capital credits are *retired*, a check is issued to you.

How are capital credits calculated?

Each year, net margins of the cooperative are divided among the members based on each member's electric consumption for the year. Members who use more electric service receive a larger amount of capital credits allocated to their account.

Will I receive a capital credits check every year?

The board of trustees must authorize a retirement before you receive a check. When considering a retirement, the cooperative's board of trustees must consider the financial condition of the cooperative, the need for cash and the availability of loan funds.

What happens to my capital credits when I leave HWEC's service area?

Your capital credits remain on the books in your name and member number until they are retired. Because payments are made to current and former members alike, you should ensure that HWEC always has your current mailing address.

I have been a cooperative member for several years. When will I receive a capital credits check?

Most recently, the HWEC Board of Trustees approved the retirement of capital credits from 1993. Members who joined the cooperative since 1993 have not yet received a general capital credits retirement. The unretired capital credits, or "equity" of the cooperative, serves a vital function — allowing the cooperative to operate economically and effectively, while investing in the infrastructure necessary to meet the needs of our members. A 20-year capital patronage cycle is the common industry standard.

What are unclaimed capital credits?

HWEC wants to ensure members receive this benefit, but sometimes we are not able to reach members after they have moved from our lines, leaving their capital credits "unclaimed." In this month's and November's issues of *Country Living*, we have included a list of members who have not claimed their capital credits. If you recognize anyone listed, please have them contact our office toll free at 866-674-1055.

HWEC also needs to be notified by a relative or other legal representative when a member passes away so that the account can be closed or transferred to another person's name.

As a member-owner of your electric cooperative, you receive capital credits.

In the past 10 years, Holmes-Wayne Electric has distributed more than **\$12.5 million** in capital credits to its members.

Unclaimed capital credits

In June 2010, Holmes-Wayne Electric Cooperative, Inc., mailed a general retirement of capital credits. Many checks were returned to us as undeliverable and, to date, these refunds remain unclaimed. Per the cooperative's Code of Regulations, the unclaimed capital credits are reallocated to current cooperative members four years following the original mailing and following two consecutive notices in this publication. This is the first notice. Anyone with information on these members or their heirs, whose name and last known residence is listed, is asked to contact the cooperative office toll-free at 866-674-1055. Contact must be made within 60 days following the last date of the publication of this notice of Jan. 1, 2015.

Keeping you informed

HVEC works hard to provide reliable service to all of our members. There are times when the cooperative must create a temporary planned outage. In order to contact members of such occasions, it is important for all cooperative members to maintain an active phone number.

A correct phone number in the HVEC system also allows for quick reference for after-hours outage reporting. If you currently do not have an active or correct phone number on file with the cooperative, please contact the office toll free at 866-674-1055 to update your account.
